INTRODUCTION

Geography is the study of places and the relationships between people and their environments. Geographers explore both the physical properties of Earth's surface and the human societies spread across it. They also examine how human culture interacts with the natural environment and the way those locations and places can have an impact on people.

Sustainability, sustainable development, and environmental issues long have been integral to geographic research and teaching. Geographers are engaged with diverse aspects of sustainability studies. Geography provides the basic building blocks for the study of resource use and sustainable development. As resources are largely limited and finite, humans as agents of change must employ techniques that allow an efficient and lasting use of the available resources in their environment.

The two days International Conference on Geography, Environment And Sustainable Development aims to bring together leading academic scientists, researchers and research scholars to exchange and share their experiences and research results on all aspects of Environment, Geography, and Sustainability. It also provides a premier interdisciplinary platform for researchers, practitioners, and educators to present and discuss the most recent innovations, trends, and concerns as well as practical challenges encountered and solutions adopted in the fields of Environment, Geography, and Sustainability.

The upcoming International webinar jointly organize by Dept. of Geography, A N College, Patna, Bihar; International Benevolent Research Foundation (IBRF), Kolkata, West Bengal and Confederation of Indian Universities (CIU), New Delhi on 2nd, 3rd and 4th July, 2021 will encompass on **Geography, Environment and Sustainable Development**. The webinar aims to create a forum for dissemination of knowledge and interaction of ideas.

THEMES & SUB THEMES

The theme of the Conference is **"Geography, Environment and Sustainable Development."**

Academics, faculties, Scientists, Students and Research Scholars are cordially invited and also encouraged to attend the International conference through Google meet and contribute their research work by sending abstracts, papers and e-posters strictly adhering to the sub-themes mentioned below:

- **Physical and Cultural Geography**
- Social Geography and Population Studies
